LUBRICANT  
INDUSTRY

# EXTENSIVE GLOBAL FOOTPRINT

- *Protect your brand and packaging standards by receiving equivalent products manufactured worldwide.*
- *Minimize supply chain risks with backup production facilities to ensure continuity of supply.*
- *Our facilities are strategically located near you, which helps reduce transportation costs, improves the environmental footprint of your package and reduces the risk of damage during transportation.*
- *Partner with a single supplier for all your needs.*

## INNOVATION & EXPERTISE

- *Innovative solutions to solve real-world challenges.*
- *Tailored product features and value-added services designed for you.*
- *Packaging for unique lubricant applications including lubricants approved for food contact, white oils and clean lubricants for motors/metal working applications.*
