# GCUBE® FLEX 2.0

## Features

### OVERVIEW

- ✓ Composite IBC creates durable packaging for protecting sensitive products during transport and filling.

### FLEXIBLE INNER LINER

- ✓ Able to expand and unroll automatically inside the container guaranteeing a homogeneous position of the liquid.

### CONNECTOR

- ✓ Constructed to fit different variations of fittings based on customer needs and requirements.
- ✓ Customized to fit a variety of connectors based on customer needs and requirements.

### EXTERNAL BAG

- ✓ Two-layer external polypropylene bag with external waterproof layer and a soft inner layer to reduce flex-cracking.

### SHIPPING

- ✓ Reduced cost for global shipments.
- ✓ Improved stackability and design to suit all types of transport.

### SUSTAINABILITY

- ✓ The external GCUBE® structure (cage and pallet) can be collected and reconditioned globally using the Greif reconditioning network.
